## Scene Description:

This sample text is just used to fill and hold the space. Such dummy text is also useful to quickly give a demonstration of how something will look when proper text will be in place.

As soon as you'll type this and hit space or enter –three paragraphs of sample text (with four lines in each para) will appear in place of this command.

Sample Text: Testing

## Services Provided:

### 05-09-2020 :

- 1) Based on state and federal regulations, Steri-Clean will provide biohazard remediation technician(s) to properly remove and dispose of all biological matter.
- 2) All soft goods/porous items affected with biohazard (bodily fluids/blood) will be removed and disposed of in biohazard containers for pickup with a licensed biohazard disposal company. Tracking documents and inventory of disposed items available upon request.
- 3) Porous surfaces such as wood, carpet, and subfloor affected with biohazard may not be properly disinfected and may need to be removed and disposed of in biohazard containers. Structural elements will be inspected to see if affected with biohazard. If found to be affected, approval will need to be given to address these elements.
- 4) Any non-porous surfaces (walls, etc.) within the contaminated areas will have a hard surface wash down performed using an EPA hospital grade disinfectant to address any potential bacteria that may be present.
